

EVO-WAVE

EVO-DOORS

BY RENLITA

BIFOLD VERTICAL OPENING

The EVO-WAVE is a bifolding vertical door, window, or wall that transforms any space with ease. The powder coated steel frame and simple to install design creates functional and beautiful spaces for entertaining or enjoying on your own. With no huge motors, visible cables & straps or hydraulic pumps needed, this simple to install system is a perfect addition.

MULTIPLE SIZES & COLORS

The EVO series is made to be beautiful. With a max size of 10 feet wide and 10 feet tall and multiple color choices the EVO is perfect for all sorts of applications.

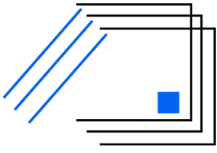

EASY INSTALLATION

Why make things difficult? The EVO is designed for easy installation and uses a typical electrical outlet to provide power. No need for hydraulics!

SCREEN & SHADE INTEGRATION

With options like insect screens and sun shades that integrate right into the sleek touch screen, the EVO-WAVE is the perfect way to open up any façade.

EVO-WAVE

EVO-DOORS

BY RENLITA

Creating a flexible visual centerpiece with the iconic look of a swing out door has never been easier. Featuring battery backup, touch screen operation, multiple glass options, and insect screens or sun shade options, you can have it all!

WELCOME TO
THE EVOLUTION

TOUCHSCREEN CONTROL

The 5" touchscreen brings all the features together in one, easy-to-use interface. The brushed aluminum faceplate fits perfectly into any interior design.

FINISH OPTIONS

STANDARD

With multiple standard color options and super durable powder coating, you can design your vision and know that it will last.

CUSTOM

If your project requires an expertly matched powder coat finish, we can do that. Just send us a sample and our team of powder manufacturers will create the perfect match.

GLASS OPTIONS

GOOD

1/4" tempered glass is perfect for mild environmental conditions where temperature transfer is not a concern.

BETTER

1" insulated clear tempered glass provides great insulation from the elements where it's not exposed to direct sunlight.

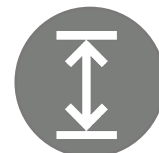

BEST

1" insulated Low-E glass is the best option for protecting against thermal and solar energy transfer.
