

MICKY FINS BAR & GRILL

THE PROJECT

Micky Fins is a renowned restaurant situated in Ocean City, Maryland. Known for its delectable cuisine and captivating ambiance, the restaurant aims to provide an exquisite setting that captures the essence of coastal living. The management of Micky Fins sought to create an inviting atmosphere that seamlessly blended the indoor and outdoor spaces.

They desired a solution that would allow them to maximize the captivating bay views, enhance the dining experience, and maintain a comfortable environment year-round, so flexibility was key. To address these challenges, the restaurant collaborated with Evo-Doors to design 17 Evo-Vue doors, accompanied by 17 fixed panels positioned below each door.

OUR SOLUTION

The Evo-Vue single-panel linear actuator system, provided by Evo-Doors, was the perfect solution. The electric linear actuator system lifts the door without blocking the view, unlike cable or strap doors. The Evo-Vue includes integrated, low-profile weather seals to ensure comfort and satisfaction. The sleek and modern design of the doors seamlessly integrated with the restaurant's aesthetics, elevating its overall appearance.

The collaboration between Micky Fins and Evo-Doors resulted in a resounding success, transforming the restaurant into a destination that encapsulated the essence of coastal living. With the installation of 17 Evo-Vue doors and fixed panels, the establishment achieved the perfect balance between nature and comfort. The doors brought in fresh air, showcased the breathtaking bay views, and helped create an unforgettable and enchanting dining atmosphere.

BENEFITS

1. Versatility and Fresh Air

The installation of 17 Evo-Vue doors allowed Micky Fins to create a flexible environment that adapts to the changing weather. During the summer months, you can easily open the doors to invite fresh ocean air. During winter, the Evo-Vue doors showcased their insulating capabilities, as they effectively maintained a warm and cozy interior. This feature enhanced the restaurant's year-round operational efficiency.

2. Unobstructed Views

One of the standout features of Evo-Vue doors is their ability to provide unobstructed views of the bay when opened. The linear actuator system provides the raw power needed to lift the door without cables or straps obstructing the view. Guests can enjoy the panoramic beauty of the bay, creating a truly immersive dining experience.

3. Enhanced Atmosphere

The combination of Evo-Vue doors and fixed panels imbued the restaurant with a distinct ambiance. The seamless integration of the indoor and outdoor spaces created a unique and captivating atmosphere that perfectly complemented the coastal setting. The Evo-Vue doors have since captivated the restaurant's patrons with their unobstructed views and made Micky Fins the place to be.

AT A GLANCE

CHALLENGES

- Changing Seasons
- Interior space

BENEFITS

- Versatility and Fresh Air
