

EVO-FLEX

EVO-DOORS

BY RENLITA

SELF-LIFTING SWING-OUT

The EVO-FLEX is a manual gas strut window system that can transform any space with ease. The powder coated aluminum frame and simple installation makes this an ideal solution for those who want to elevate their design and create a dynamic space. The EVO-Flex is perfect for projects where the window seals directly to the bar top.

MULTIPLE SIZES & COLORS

Each window is custom built to your project size and powder coated to your choice of four standard colors.

INSTALLATION OPTIONS

Why make things difficult? The EVO-Flex installation is similar to a standard window.

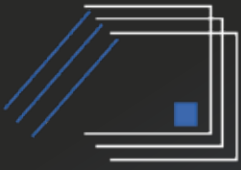

SCREEN & SHADE OPTIONS

Our motorized screens can be used in addition to the EVO-Flex and offer an easy way to keep insects out or add a little shade.

FEATURES

FLUSH BOLT LOCKS

Two flush bolt locks on the inside of the door not only provide security but a sleek look with a brushed nickle finish.

HANDLE

The handle is mounted inside for easier grip when opening and closing the window.

GAS STRUTS

The two gas struts allow the window to glide open with ease after unlocking.

OPTIONS

GLASS

SINGLE PANE TEMPERED

1/4" tempered glass is perfect for mild environmental conditions where temperture transfer is not a concern.

FINISH

STANDARD

With multiple standard color options and super durable powder coating, you can design your vision and know that it will last.

SIZE

MAX WIDTH
8 FEET

DOUBLE PANE LOW-E
